TRIMEC® 992
BROADLEAF HERBICIDE

Controls Dandelion, Clover, Knotweed, Henbit, Chickweed, Plantain, Spurge and other listed broadleaf weeds.

ONE GALLON COVERS UP TO 2.5 ACRES

KEEP FROM FREEZING

ACTIVE INGREDIENTS:
- Dimethylamine salt of 2,4-dichlorophenoxyacetic acid: 30.56%
- Dimethylamine salt of 2-(methyl-4-chlorophenoxo)propionic acid: 2.37%
- Dimethylamine salt of dicamba: 3.6-dichlor-o-anisic acid: 2.77%

OTHER INGREDIENTS: 55.55%

THIS PRODUCT CONTAINS:
- 2.38 lb 2,4-dichlorophenoxyacetic acid, equivalent per gallon: 25.39%
- 0.63 lb 2,4-dichlorophenoxyacetic acid, equivalent per gallon: 4.73%
- 0.03 lb 3,6-dichloro-2-anisic acid, equivalent per gallon: 0.75%

Formulated by AOAC Methods.

TRIMEC® is a registered trademark of PBI-Gordon Corporation.

KEEP OUT OF REACH OF CHILDREN
DANGER-PELIGRO

Si Usted no entiende la etiqueta, busque a alguien para que le explique a Usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 190.

READ THE ENTIRE LABEL FIRST.
OBSEVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals
DANGER: Corrosive. Causes irreversible eye damage. Harmful if swallowed. Harmful if absorbed through skin. Do not get in eyes, on skin, or on clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

Personal Protective Equipment (PPE)
Some materials that are chemical-resistant to this product are natural rubber. If you want more options, follow the instructions for category A on an EPA chemical-resistance category selection chart.
- All mixers, loaders, applicators and other handlers must wear:
  - protective eyewear,
  - long-sleeved shirt and long pants,
  - shoes and socks,
  - chemical-resistant gloves and
  - chemical-resistant apron when mixing or loading, cleaning up spills or equipment, or otherwise exposed to the concentrate.

Applicators may choose not to wear protective eyewear ONLY with dilution rates greater (higher) than 5.1 or greater (higher) than 5 parts of water to 1 part of product.

See engineering controls for additional requirements.

Engineering Control Statements
When handlers use closed systems or enclosed cab in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

User Safety Requirements
Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent material that have been drenched or heavily contaminated with the product's concentrate. Do not reuse them.

User Safety Recommendations:
- Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Users should remove clothing/PPE immediately if pesticide gets inside. Wash thoroughly and put on clean clothing. If pesticide gets in eye, wash immediately with soap and water.
- Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

First Aid
- In eyes:
  - Hold eye open and rinse slowly and gently with water for 15-20 minutes.
  - Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
  - Call a poison control center or doctor for treatment advice.

- If swallowed:
  - Call a poison control center or doctor immediately for treatment advice.
  - Have person sip a glass of water if able to swallow.
  - Do not induce vomiting unless told to do so by the poison control center or doctor.
  - Do not give anything by mouth to an unconscious person.

- If on skin:
  - Take off contaminated clothing.
  - Rinse skin immediately with plenty of water for 15-20 minutes.
  - Call a poison control center or doctor for treatment advice.

- If inhaled:
  - Move person to fresh air.
  - If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
  - Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-877-800-5556 for emergency medical treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

Environmental Hazards
This pesticide is toxic to fish and aquatic invertebrates and may adversely affect non-target plants. Do not apply directly to water to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash waters or rinseate.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.
2. Product Description

Designed for turfgrass applications, non-crop, and GV (Industrial Vegetation Management) applications, this product contains three active ingredients.

1. 2,4-D is an auxin-type herbicide which is a class of plant growth regulators. It is absorbed through the leaves and is translocated to the growing points of the plant, causing wood stems curd and twist, leaf cupping and withering, and eventual plant death.

2. MCPA (methylcrotonic acid) is an auxin-type herbicide, which is a class of plant growth regulators. It is absorbed through the leaves and is translocated to the growing points of the plant, causing wood stems curd and twist, leaf cupping and withering, and eventual plant death.

3. Dicamba is absorbed through the leaves and roots and has multiple modes of action for hard-to-kill broadleaf weeds. Combining these herbicides provides a very wide spectrum of weed control for susceptible weeds. Trimec 992 Broadleaf Herbicide contains weeds by affecting multiple sites within the broadleaf weeds. The symptoms of susceptible broadleaf weeds include leaf and stem curd or twisting, and weed yellowing. These combined herbicides provide limited residual activity.

Trimec 992 Broadleaf Herbicide offers these advantages:
- Excellent postemergent activity with proven performance.
- The combinations of these active ingredients provide effective weed control for common and troublesome weed species in turfgrass, including: dandelion, spurge and white clover.
- Rainfast as little as 6 hours.
- Controls major turf weeds.
- Often, the weed injury symptoms can be noticed within hours of the application and plant death can occur within 14 to 21 days.

3. Spray Preparation and Tank Mixes

In certain applications, liquid fertilizer may replace part of the water.

Mixing with water:
Add one-half the required amount of water to the spray tank, then add Trimec 992 Broadleaf Herbicide slowly with agitation, and completely fill the tank with water. Mix thoroughly and continue agitation while spraying. When this product is left standing for extended periods of time, re-agitate to assure uniformity of the spray mixture.

Mixing with liquid fertilizers:
Use suitable sources and rates of fertilizer based upon advice of your fertilizer supplier or State Extension Service Specialist. Verify physical compatibility with a jar test. Always perform a jar test for compatibility before large scale mixing. The jar test can be conducted by mixing all components in a small container in proportionate quantities. If the mixture separates after standing and can be mixed readily by shaking, then the mixture can be used and applied with spray equipment providing continuous agitation. If large flakes, sludge, gels or other precipitates form, or if a separate oily layer or oil globules appear, then the herbicide and the liquid fertilizer must not be prepared as a tank mixture.

Liquid fertilizers are either solutions (true fluids) or suspensions. Mixing this product with suspensions or N-P-K solutions may not be satisfactory (may be marginal) without pre-mixing this product with water. Premixing this product with 2 to 4 parts water will ensure that the dispersants enable the herbicide to be suspended in the fertilizer.

Adjuvants and spray additives:
Adjuvants (such as surfactants, spreaders, spreader-stickers, spray thickeners, foaming agents, activators, detergents, and drift reducing agents) combined with this product can damage the leaf tissue of turfgrass. If any discoloration or cosmetic effects are objectionable or would be unacceptable, then adjuvant(s) combined with Trimec 992 Broadleaf Herbicide would not be recommended. Do not use adjuvants and spray additive tank-mix combinations, unless your experience indicates that the tank mixture will not result in turf injury. When an adjuvant is used with this product, the manufacturer recommends the use of Chemical Producers and Distributors Association (CPDA) certified adjuvant.

4. Ground Equipment

Spray distribution: The accuracy and uniformity of the herbicide distribution is the sole responsibility of the applicator. Power sprayers fitted with a boom or spray wand/gun may be used for broadcast applications and spot treatments. Boom sprayers equipped with appropriate nozzles, tips, and screens are suitable for broadcast applications. For
best spray distribution and coverage, select a spray volume and
delivery system that will ensure accurate and uniform coverage.
Spray volumes of 5 to 220 gallons per acre with spray pressures
adjusted to between 20 to 40 psi. Note: For bentgrass (except golf
greens), spray volume use 145 to 220 gallons per acre. Use higher
spray volumes for dense weed populations (up to 220 gallons per acre
or 5 gallons per 1,000 square feet).
- Calibration and proper application are essential when using this
product.
- Over-application or rates above those specified on this label can
cause turf injury.
- Hand-held technique: Wands fitted with flat fan nozzle tips may be
used with the appropriate technique. Flat fan nozzles should not be
washed in a back-and-forth motion, or in a side-to-side motion, or in a
swinging arm motion. Instead, the nozzle should be held stationary
at the proper height. Side-to-side motion results in uneven
coverage.
Hand operated sprayers including backpack sprayers, compression
sprayers are appropriate for small turfgrass areas.
After using this product, clean sprayer with soap or detergent and
water, or an approved spray tank cleaner and rinse thoroughly before
applying other pesticides.

5. Where to Use
This product provides broadleaf control in the following sites.
- Ornamental Turfgrass sites:
  - Residential/domestic sites are defined as areas associated with
    the household or home life including apartment complexes,
    condominiums, and patient care areas of nursing homes, mental
    institutions, hospitals, or convalescent homes.
  - Ornamental turf sites include turfgrass established around
    residences, parks, streets, retail outlets, cemeteries, industrial
    and institutional buildings, recreation areas, fairgrounds, areas
    adjacent to athletic fields and paved areas.
  - Institutional sites are defined as turf areas around properties
    facilities providing a service to public or private organizations
    including, but not limited to hospitals, nursing homes, schools,
    museums, libraries, sport facilities, golf courses (fairways and
    greens), and office buildings.
  - Non-cropland sites: including farmyards, fencerows or fence lines,
    highway rights-of-way (principal, interstate, county, private, and
    unpaved roads); Roadsides, roadside ditches, road shoulders, road
    embankments, dividers, and medians; Industrial sites; Lumberyards,
    farm fields, fuel or equipment storage areas; Municipal, state, and
    federal lands; Airports and military installations; railroad rights-of-
    ways, railroad yards, railroad crossings and railroad bridge
    abutments; Utility rights-of-way: telephone, pipeline, electrical
    powerlines, and communication transmission lines.
  - Agricultural site: Commercial sod production.

Prohibitions of Sites:
- Do not apply to any body of water such as lakes, streams, rivers,
  ponds, reservoirs, or estuaries (salt water bays). Do not apply to any
  shorelines (non-cropland sites adjacent to the edges of a body of
  water) for lakes, streams, rivers, ponds, reservoirs, or estuaries (salt
  water bays).
- Do not apply to wetlands (swamps, bogs, potholes, or marshes).
- Do not apply to agricultural irrigation water or on agricultural
  irrigation ditches and canals.
- Do not apply to agricultural drainage water or on agricultural
  drainage ditches.
- Applications to non-cropland areas are not applicable to treatment
  of commercial timber or other plants being grown for sale or other
  commercial use, or for commercial sawd production, or for research
  purposes.
- Do not apply or allow this product to come into direct contact with
  cotton, grapes, tobacco, vegetable crops, flowers, fruit or orna-
  mental trees, or other desirable broadleaf plants; small amounts of
  spray drift may injure susceptible plants, including ornamental trees
  or shrubs.

Turfgrass tolerance:
- The turfgrass tolerance to this product may vary and temporary
turfgrass yellowing may occur. Adverse environmental conditions
may reduce the selectivity on the turfgrass. Do not apply this
product to stressed turf.
- Certain spray tank additives (adjuvants, wetting agents, surfac-
tants), liquid fertilizers, and tank mixtures containing emulsifiable
concentrates may reduce the selectivity on the turfgrass. Do not use
adjuvants and spray additive tank-mix combinations, unless your
experience indicates that the tank mixture will not result in turf
injury. When an adjuvant is used with this product, the manufacturer
recommends the use of Chemical Producers and Distributors
Association (CPDA) certified adjuvant.

Prohibitions:
- Do not apply this product to St. Augustine grass, bentgrass greens,
  carpetgrass, dichondra, legumes, and lawns where desirable
clovers are present.
- Do not broadcast apply this product when temperatures are above
  90°F, some injury may be expected with spot treatments when air
  temperatures exceed 90°F. Where state, county or local
governments have more stringent temperature regulations, these
  regulations must be observed.
- To avoid turf injury, use only on turfgrass that is reasonably free of
  stress from diseases, insects, excess heat or cold, drought or
  excessive rain/irrigation, shaded areas, nematodes, improper
  mowing or improper applications of fertilizer and pesticides. Injury
  can occur if this product is applied under any of these or other
  stress conditions. Under any of these stress conditions, any turf
  damage caused by the use of this product is beyond the control of
  the registrant and all risk is assumed by the user and/or user.
- For ground application only; aerial applications are not permitted.
- Do not use this product on or near desirable plants, including
  contact of spray on exposed root systems or adventitious shoots
  within the dripline of desirable trees and shrubs, since injury
  may result.

6. Application Schedules
Apply this product to broadleaf weeds that are young and actively
growing for the best results. Fallow applications can provide improved
control for emerged winter annuals and perennials such as hawkbit,
chickweed, clover and ground ivy.
For the Listed Residential/domestic sites, Ornamental Turf sites,
Institutional sites, and Agricultural sites:
Do not apply more than two (2) broadcast treatments of this product
per site per year. A second broadcast application or a follow-up
application as a spot treatment is advised for more mature weeds, for
dense infestations, and for adverse environmental conditions.
Spot treatments during the summer may be appropriate for sparse
infestations, or as a follow-up treatment, or any time broadleaf weeds
are actively growing.
For the Listed Non-cropland sites:
Use only one (a single) broadcast treatment of this product per site per
year for woody plant infestations, or two broadcast treatments for
annual and perennial weeds. It is required to wait 30 days between
applications and a spot treatment may be substituted for the second
broadcast treatment if necessary.
Extreme environmental conditions (e.g., temperature and moisture,
soil conditions, and cultural practices) may affect the activity of this
product. Under warm moist conditions, herbicide symptoms may be
accelerated. While under very dry conditions, the expression of
herbicide symptoms is delayed, and weeds hardened off by drought
are less susceptible to this product.
For newly seeded areas:
Delay application of this product to grass seedings until after the
second mowing.
For newly sodded, sprigged, or plugged areas:
The application of this product to newly sodded, sprigged, or plugged
grasses should be delayed until 3 to 4 weeks after the sodding,
sprigging, or plugging operations.
Reapplying Interval:
Treated areas may be reseeded 3 weeks after application.

7. How Much to Use
USE RATES AND SPRAY VOLUMES:
Generally, the lower application rates within the specified range will
provide satisfactory control of sensitive weed species. The higher
application rates within the specified range will be required for dense
infestations of perennial weeds, for adverse/extreme environmental
conditions, or for weeds hardened off or more mature.
TABLE 1. USE RATES FOR ORNAMENTAL TURF SITES, NON-CROPLAND AND SOD FARMS

<table>
<thead>
<tr>
<th>Species</th>
<th>Rate</th>
<th>Spray Volume</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cool-season Turf</td>
<td>3.0 to 4 Pints/Acre (1.1 to 1.5 fl.oz./1,000 sq.ft.)</td>
<td>5 to 220 Gallons/Acre (0.125 to 5.0 Gallons/1,000 sq.ft.)</td>
</tr>
<tr>
<td>Creeping Bentgrass (excluding golf greens)</td>
<td>1.8 Pints/Acre (0.66 fl.oz./1,000 sq.ft.)</td>
<td>145 to 220 Gallons/Acre (3.33 to 5.0 Gallons/1,000 sq.ft.)</td>
</tr>
<tr>
<td>Warm-season Turf</td>
<td>3.0 to 4 Pints/Acre (1.1 to 1.5 fl.oz./1,000 sq.ft.)</td>
<td>5 to 220 Gallons/Acre (0.75 to 0.83 fl.oz./1,000 sq.ft.)</td>
</tr>
</tbody>
</table>

Note: Do not apply to above listed warm-season turfgrass unless some turf injury can be tolerated. It is impossible to test all environmental conditions for the listed warm-season turfgrass.

SPOT TREATMENT:
WITH HAND OPERATED SPRAYERS (INCLUDING BACKPACK SPRAYERS AND PUMP-UP TYPE SPRAYERS):
- Apply any time the emerged broadleaf weeds are actively growing.
- Calibration and proper application are essential when using this product.
- Uniform applications are essential when using this product. Over application or rates above those specified on this label including excessive overlap of this product can cause turf injury.
- Hand-held techniques: Wands fitted with flat fan nozzle tips may be used with the appropriate technique. Flat fan nozzles should not be bevelled in a back-and-forth motion, or in a side-to-side motion, or in a swinging arm motion. Instead, the nozzle should be held stationary at the proper height. Side-to-side motion results in uneven coverage.
- Follow-up applications as spot treatments at a 30 day interval are suitable for more mature weeds, for dense infestations, and for adverse environmental conditions.

For cool-season turfgrass (except Bentgrass) listed in Table 1: Mix 1.1 to 1.5 fl.oz. of this product per one (1.0) gallon of water for treatment of approximately 1,000 sq.ft. of turfgrass. Apply any time the emerged broadleaf weeds are susceptible.

For Bentgrass (excluding golf greens); Mix 0.06 fl.oz. of this product per four (4.0) gallons of water for treatment of approximately 1,000 sq.ft. of Bentgrass. This high spray volume will provide uniform coverage. Apply any time the emerged broadleaf weeds are susceptible.

For warm-season turfgrass listed in Table 1: Mix 0.75 to 0.83 fl.oz. of this product per one (1.0) gallon of water for treatment of approximately 1,000 sq.ft. of turfgrass. Apply any time the emerged broadleaf weeds are susceptible.

Limitations on spot treatments to residential turfgrass: Spot treatment is defined as a treatment area no greater than 1,000 sq.ft. per acre. The maximum application rate is 1.5 fl.oz. per 1,000 sq.ft. per application (0.33 lb MCPP-p acid equivalent per acre). The maximum number of spot treatments is limited to 2 per year with a minimum of 30 days between applications.

CULTURAL TIPS:
Irrigation:
- Do not apply this product through any type of irrigation system.
- Rainfast in as little as 5 hours. Do not apply this product immediately before rainfall or irrigation.
- If possible, do not irrigate or water the turfgrass within 6 to 24 hours after application.
- If dry conditions exist, a scheduled irrigation or watering 24 hours before and 24 hours after application is recommended.

Mowing:
- For optimum results, delay mowing 2 days before and until 2 days after the application of this product.

8. Broadleaf Weeds Controlled
Trimec® 992 Broadleaf Herbicide will control the following broadleaf weeds. Apply any time the emerged broadleaf weeds are susceptible.

9. For Use in Non-Cropland: Brush and Weed Control

High volume foliar applications:
Apply up to 1.15 gallons of product per 100 gallons of water or apply a 1.0 to 1.15% vol/vol spray solution as a full cover spray with high volume equipment. Use the lower spray concentrations in the range for susceptible species and use the higher spray concentrations within the range for hard-to-control species, for mature plants during the late summer or under adverse environmental conditions (e.g. drought).
Spray broadleaf weeds, woody plants or mixed brush uniformly and thoroughly by wetting all leaves, stems, bark and root collars. The minimum total volume of spray solution required for adequate coverage of solid stands of mixed brush is 25 gallons of spray solution per treated acre. The spray preparation chart for applications on a spray-to-wet basis is shown below in Table 2.

<table>
<thead>

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container in a locked storage area inaccessible to children or pets. Keep from freezing.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinseate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

Nonrefillable containers with capacities equal to or less than 5 gallons:

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available, or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning if burned, stay out of smoke.

Triple rinse or pressure rinse container (or equivalent) promptly after emptying.

Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

Pressure rinse as follows: Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank and collect rinseate for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

Nonrefillable containers with capacities greater than 5 gallons:

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available, or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning if burned, stay out of smoke.

Triple rinse or pressure rinse container (or equivalent) promptly after emptying.

Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Repeat this procedure two more times.

Pressure rinse as follows: Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank and collect rinseate for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

For Refillable Containers:

CONTAINER HANDLING: Refillable container. Refill this container with pesticide only. Do not reuse this container for any other purpose.

Container cleaning: Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller.

To clean the container before final disposal, empty the remaining contents from this container into application equipment or a mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinseate into application equipment or rinseate collection system. Repeat this rinsing procedure two more times.

LIMITED WARRANTY AND DISCLAIMER

IMPORTANT: Read this LIMITED WARRANTY AND DISCLAIMER before buying or using this product. By opening and using this product, buyer and all users agree to accept the terms of this LIMITED WARRANTY AND DISCLAIMER in their entirety and without exception. If the terms are not acceptable, return this product unopened immediately to the point of purchase, and the purchase price will be refunded in full.

It is impossible to eliminate all risks inherently associated with use of this product. Damage to the treated article, ineffectiveness, or other unintended consequences can result from use of the product under abnormal conditions such as weather, presence of other materials, or the manner of use or application, etc. Such factors and conditions are beyond the control of the manufacturer, and BY PURCHASING AND USING THIS PRODUCT THE BUYER AND ALL USERS OF THIS PRODUCT AGREE TO ACCEPT ALL SUCH RISKS. Buyer and all users further agree to assume all risks of loss or damage from the use of the product in any manner that is not explicitly set forth in or that is inconsistent with label instructions, warnings and cautions.

The manufacturer warrants only that this product conforms to the chemical description given on the label, and that the product is reasonably suited for the labeled use when applied according to the Directions for Use, subject to the inherent risks described below. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE MANUFACTURER NEITHER MAKES NOR INTENDS ANY OTHER EXPRESS OR IMPLIED WARRANTIES, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE HEREBY EXPRESSLY DISCLAIMED.

THE EXCLUSIVE REMEDY OF BUYER AND ALL USERS OF THIS PRODUCT, AND THE EXCLUSIVE LIABILITY OF THE MANUFACTURER, FOR ANY AND ALL LOSSES, DAMAGES, OR INJURIES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, WHETHER OR NOT BASED IN CONTRACT, NEGLIGENCE, STRICT LIABILITY IN TORT OR OTHERWISE, SHALL BE LIMITED, AT THE MANUFACTURER'S OPTION, TO REPLACEMENT OF OR THE REPAIRMENT OF THE PURCHASE PRICE FOR THE QUANTITY OF PRODUCT WITH RESPECT TO WHICH DAMAGES ARE CLAIMED, TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, IN NO CASE SHALL THE MANUFACTURER BE LIABLE FOR INCIDENTAL, CONSEQUENTIAL, OR SPECIAL DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. The Manufacturer must be promptly notified in writing of any claims, whether based in contract, tort, negligence, strict liability, or otherwise, to be eligible to receive either remedy stated above.

The terms of this LIMITED WARRANTY AND DISCLAIMER cannot be varied by any written or verbal statements or agreements at the point of sale or elsewhere. No employee or agent of the manufacturer or seller is authorized to vary or exceed the terms of this Limited Warranty and Disclaimer in any manner.

ATTENTION: This specimen label is provided for informational use only. This product may not yet be available for sale in your state or area. The information found in this label may differ from the information found on the product label you are using. Always follow the instructions for use and precautions on the label of the product you are using.

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND OF THE COMPANY/UNDERTAKING

Product identifier
Product Name: TRIMEC® 992 Broadleaf Herbicide

Other means of identification
Product Code: PBI FP 992-0
EPA Pesticide Registration Number: 2217-656

Recommended use of the chemical and restrictions on use
Recommended Use: Herbicide.
Uses advised against: No information available.

Details of the supplier of the safety data sheet
Supplier: PBI Gordon Corporation
Manufacturer: PBI Gordon Corporation
Company Name: PBI Gordon Corporation
1217 West 12th Street
Kansas City, MO 64101

Emergency telephone number
Emergency Telephone: Chemtrec 1-800-424-9300

2. HAZARDS IDENTIFICATION

Classification
OSHA Regulatory Status
This chemical is considered hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200)

<table>
<thead>
<tr>
<th>Hazard</th>
<th>Category</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>Skin sensitization</td>
<td>Category 1</td>
</tr>
</tbody>
</table>

The International Agency for Research on Cancer (IARC) lists chlorophenoxy herbicides in its Group 2B (limited evidence for Carcinogenicity in humans.) The US EPA has given the chlorophenoxy Herbicides 2,4-D, 2,4-DP, MCPP, and MCPA a Class D classification (not classifiable as to human carcinogenicity.) More current 2,4-D lifetime feeding studies in rats and mice did not show carcinogenic effects and a recent World Health Organization (WHO) review of 2,4-D toxicology has concluded that 2,4-D is not a carcinogen.

Label elements

Emergency Overview

Danger
Hazard statements
Harmful if swallowed. Harmful in contact with skin. Causes serious eye damage. May cause an allergic skin reaction.
Appearance Liquid  Physical state Liquid  Odor Amines

Precautionary Statements - Prevention
- Wash face, hands and any exposed skin thoroughly after handling
- Do not eat, drink or smoke when using this product
- Wear protective gloves/protective clothing/eye protection/face protection
- Avoid breathing dust/fume/gas/mist/vapors/spray
- Contaminated work clothing should not be allowed out of the workplace
- Keep away from heat/sparks/open flames/hot surfaces. — No smoking
- Keep container tightly closed

Precautionary Statements - Response
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing
- Call a POISON CENTER or doctor/physician if you feel unwell
- Wash contaminated clothing before reuse
- If skin irritation or rash occurs: Get medical advice/attention
- IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower
- IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell
- Rinse mouth

Precautionary Statements - Storage
- Store in a well-ventilated place. Keep cool

Precautionary Statements - Disposal
- Dispose of contents/container to an approved waste disposal plant

Hazardst not otherwise classified (HNOC)
Have the product label with you when calling a poison control center or doctor or going in for treatment. You may also contact 1-877-800-5555 for emergency medical treatment advice.

The low flash point of this product is due to a minor component in the mixture. Based on independent laboratory testing of similar products, this product would not sustain combustion as specified in DOT Regulation 49 CFR 173 Appendix H; however OSHA HCS 2012 flammable classifications are solely based on tested mixture flash points and boiling points.

4. FIRST AID MEASURES

First aid measures
General advice  In case of accident or unwellness, seek medical advice immediately (show directions for use or safety data sheet if possible). If symptoms persist, call a physician.

Eye contact  Immediately flush with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. Keep eye wide open while rinsing. If symptoms persist, call a physician.

Skin Contact  Wash contaminated clothing before reuse. Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. If skin irritation persists, call a physician.

Inhalation  Remove to fresh air. If breathing is irregular or stopped, administer artificial respiration. Avoid direct contact with skin. Use barrier to give mouth-to-mouth resuscitation. Artificial respiration and/or oxygen may be necessary. Move to fresh air in case of accidental inhalation of vapors. If symptoms persist, call a physician.

Ingestion  Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Call a physician immediately.

Self-protection of the first aider  Use personal protective equipment as required.

Most Important symptoms and effects, both acute and delayed

Symptoms  No information available.

Indication of any immediate medical attention and special treatment needed

Note to physicians  May cause sensitization of susceptible persons. Treat symptomatically.

---

5. FIRE-FIGHTING MEASURES

Suitable extinguishing media

Specific hazards arising from the chemical
In the event of fire and/or explosion do not breathe fumes. May cause sensitization by inhalation and skin contact. Thermal decomposition can lead to release of irritating and toxic gases and vapors.

Explosion data
- Sensitivity to Mechanical Impact: None.
- Sensitivity to Static Discharge: None.

Protective equipment and precautions for firefighters
Wear self-contained breathing apparatus for fire fighting if necessary.

---

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Personal precautions
Evacuate personnel to safe areas. Ensure adequate ventilation, especially in confined areas. Use personal protective equipment as required. Keep people away from and upwind of spill/leak.

Environmental precautions

Environmental precautions
Prevent further leakage or spillage if safe to do so. Prevent product from entering drains. Do not flush into surface water or sanitary sewer system. See Section 12 for additional ecological information.

Methods and material for containment and cleaning up

Methods for containment
Prevent further leakage or spillage if safe to do so.
Methods for cleaning up
Pick up and transfer to properly labeled containers. Dam up. Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust).

7. HANDLING AND STORAGE

Precautions for safe handling
Ensure adequate ventilation, especially in confined areas. Take precautionary measures against static discharges. Use with local exhaust ventilation. Use personal protective equipment as required. Do not breathe dust/fume/gas/mist/vapors/spray.

Advice on safe handling

Conditions for safe storage, including any incompatibilities
Storage Conditions
Keep in properly labeled containers. Keep containers tightly closed in a cool, well-ventilated place.

Incompatible materials
Acids.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Control parameters

Exposure Guidelines

<table>

</tr>
</tbody>
</table>

NIOSH IDLH Immediately Dangerous to Life or Health

Other Information
Vacated limits revoked by the Court of Appeals decision in AFL-CIO v. OSHA, 965 F.2d 962 (11th Cir., 1992).

Appropriate engineering controls
Engineering Controls
Local and General Ventilation.

Individual protection measures, such as personal protective equipment
Eye/face protection
Tight sealing safety goggles. Face protection shield.

Skin and body protection
Wear protective gloves and protective clothing. Wear long-sleeved shirt, long pants, socks and shoes.

Respiratory protection
If exposure limits are exceeded or irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be provided in accordance with current local regulations.

General Hygiene Considerations
When using do not eat, drink or smoke. Regular cleaning of equipment, work area and clothing is recommended.

9. PHYSICAL AND CHEMICAL PROPERTIES

Autoignition temperature: No information available
Decomposition temperature: No information available
Oxidizing properties: No information available

Other information
Density: 9.3812 pounds/gallon

10. STABILITY AND REACTIVITY

Reactivity
No data available

Chemical stability
Stable.

Possibility of Hazardous Reactions
None under normal processing.

Hazardous polymerization
Will not occur.

Conditions to avoid
Extremes of temperature and direct sunlight.

Incompatible materials
Acids.

11. TOXICOLOGICAL INFORMATION

Information on likely routes of exposure

Product Information
Inhalation
No data available.
Eye contact
No data available.
Skin Contact
See "Numerical measures of toxicity-product information" in this section.
Ingestion
See "Numerical measures of toxicity-product information" in this section.
Symptoms
No information available.

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Sensitization
No information available.

Germ cell mutagenicity
No information available.

Carcinogenicity
No information available.

Reproductive toxicity
No information available.

STOT - single exposure
No information available.

STOT - repeated exposure
No information available.

Chronic toxicity
Repeated contact may cause allergic reactions in very susceptible persons. Avoid repeated exposure.

Target Organ Effects
Eyes, Respiratory system, Skin.

Aspiration hazard
No information available.

Numerical measures of toxicity - Product Information

Unknown Acute Toxicity
9% of the mixture consists of ingredient(s) of unknown toxicity

Oral LD50
> 1500 mg/kg

Dermal LD50
> 2000 mg/kg

The following values are calculated based on chapter 3.1 of the GHS document

ATEmix (inhalation-gas) 94902 mg/L
ATEmix (inhalation-dust/mist) 20.3 mg/L

12. ECOLOGICAL INFORMATION

Ecotoxicity
Toxic to aquatic life with long lasting effects

9% of the mixture consists of components(s) of unknown hazards to the aquatic environment

Persistence and degradability
No information available.

Bioaccumulation
No information available.

Other adverse effects
No information available

13. DISPOSAL CONSIDERATIONS

Waste treatment methods

Disposal of wastes
Disposal should be in accordance with applicable regional, national and local laws and regulations.

Contaminated packaging
Do not reuse container, unless specified by the manufacturer.

US EPA Waste Number
U240  See Section 2: Hazards not otherwise classified (HNOC)

14. TRANSPORT INFORMATION

DOT
Proper shipping name
For package sizes less than 41.32 gallons: product is non-regulated.

For package sizes 41.32 gallons or greater: UN3082, Environmentally Hazardous Substances, Liquid, N.O.S., 9, PGIII, RQ (2,4-D)
Description
The following guidelines apply for domestic ground transport. If shipping by air or ocean, please contact our Transportation Dept.

PESTICIDES, NO, INCLUDING DEFOLIANTS, FUNGICIDES, HERBICIDES, OR INSECTICIDES  NMFC 155050-6

If shipped in bulk containers (greater than 119 gallons), this product is a Marine Pollutant.

When shipped as a Hazardous Material, label required is Class 9 (Miscellaneous). Placards required on bulk shipments only.

15. REGULATORY INFORMATION

U.S. EPA Label Information
EPA Pesticide Registration Number 2217-655
Federal Insecticide, Fungicide, Rodenticide Act Regulations
This chemical is a pesticide product registered by the Environmental Protection Agency and is subject to certain labeling requirements under federal pesticide law. These requirements differ from the classification criteria and hazard information required for safety data sheets, and for workplace labels of non-pesticide chemicals. Following is the hazard information as required on the pesticide label:

EPA Pesticide Label
Danger. Keep out of the reach of children. Corrosive. Causes irreversible eye damage. Harmful if swallowed. Harmful if absorbed through skin. Do not get in eyes, on skin, or on clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.
